

DEEP NEMA

Banswara, India · deepnema7@gmail.com · +91 83026 92414 · [Portfolio](#) · [LinkedIn](#) · [GitHub](#)

Professional Summary

B.Tech Computer Science graduate with hands-on experience building AI-powered applications using Large Language Models (LLMs), Python, FastAPI, SQL, and modern web technologies. Experienced in developing RAG systems, semantic search, REST APIs, and data-driven solutions with a strong foundation in machine learning and full-stack development. Passionate about solving real-world problems through AI, building scalable products, and thriving in fast-paced startup environments.

Education

Vellore Institute of Technology, Bhopal

2022 – Present

B.Tech — Computer Science (Health Informatics)

Core Skills

Programming	Python, SQL, JavaScript, Java
AI & Backend	Large Language Models (LLMs), Prompt Engineering, FastAPI, REST APIs, PostgreSQL
Frontend	React.js, Next.js, HTML, CSS
Cloud & Tools	Google Cloud Platform (GCP), Git, GitHub, Docker, Postman
Professional Skills	Problem Solving, Analytical Thinking, Team Collaboration, Communication

Work Experience

SDE Intern – Saiket Systems

Nov-2025

- Developed AI-powered applications using Python, SQL, Google Gemini, and REST APIs to automate data retrieval and generate intelligent insights.
- Built LLM-based workflows with prompt engineering, semantic search, and BigQuery integration to improve information retrieval and query generation.
- Collaborated with cross-functional teams to develop, test, and deploy scalable AI solutions while maintaining technical documentation and code quality.

Skills: Python | SQL | FastAPI | REST APIs | Google Gemini | LLMs | Prompt Engineering | BigQuery | GCP | Git

Projects

MarketPulseAI – AI-Powered Market Intelligence Platform

[GitHub](#)

- Built a real-time market intelligence platform using Python, FastAPI, PostgreSQL, and REST APIs to analyze stock and cryptocurrency data.
- Implemented JWT authentication, caching, API integrations, and AI-powered market insights using Google Gemini for scalable backend services.

DocuMindAI – LLM-Powered Document Intelligence

[GitHub](#)

- Developed an LLM-powered RAG application using Python, FAISS, embeddings, and semantic search for intelligent document question answering.
- Built an end-to-end document retrieval pipeline with optimized response quality and an interactive Streamlit interface.

CorpFin-360 – Financial Analytics Dashboard

[GitHub](#)

- Built a financial analytics solution using Python, SQL, and Power BI to transform business data into interactive dashboards.
- Automated reporting workflows and developed SQL-based analytics to support data-driven business decisions.

Certifications

- IBM – Generative AI using Watsonx.ai
- Oracle – Java SE 11 Developer Professional
- Google Cloud Skills Boost – BigQuery and Cloud Data Analytics
